The service that Eminova (as an issuing agent) provides you as an investor and customer is the execution of orders. The service is a law-regulated investment service and means that Eminova purchases the financial instruments that the customer is offered by the issuer on the client's behalf, on behalf of the customer and with the customer's funds, and also delivers the financial instruments to the customer's custodian.

You are advised to read the specific information on the characteristics and risks of trading in financial instruments contained in the pre-purchase information that is available on Eminova's website <http://www.eminova.se/aboutus#-8v>. This information is only available in Swedish!

An issuing agent - which in connection with a new issue receives subscription forms for the purpose of buying listed financial instruments on behalf of investors - is obliged to obtain certain information about the investor. The issuing agent needs information on the investor's risk tolerance, risk appetite and investment horizon in order to check whether the instruments distributed are consistent with the investor's needs,

characteristics and objectives of the investment. The information that is collected is the issuing agent obliged to document.

This so-called product management is a statutory control measure and forms part of the customer protection rules that Eminova has to observe according to law. Although Eminova, based on the answers provided, considers that the investment is consistent with the customer's needs, characteristics and objectives of the investment, Eminova is not responsible for the client's investment decisions or the consequences of the decision.

You can choose to carry out the investment even if Eminova judges that the investment is not compatible with your needs, characteristics and goals of the investment. But if you fail to answer any of the questions, the order cannot be executed.

Please note that if the investor is a legal person or a person represented by eg. their guardians, questions 1-2 should be answered from the representative's perspective, while question 3 should be answered from the investor's perspective.
